## Positions

- 2025-            National University of Singapore, Lee Kuan Yew School of Public Policy  
Assistant Professor of Economics
- 2016-2019    Ministry of Economy and Finance, Republic of Korea  
Deputy Director  
Divisions: Social Policy, Population Policy, Future Policy
- 2015-2016    Seoul Metropolitan Government, Republic of Korea  
Deputy Director  
Division: Transportation Policy

## Education

- 2025            Ph.D. in Economics, University of California, Los Angeles  
Advisors: Jonathan Vogel, Pablo Fajgelbaum, Oleg Itskhoki
- 2021            M.A. in Economics, University of California, Los Angeles
- 2015            B.A. in Economics (*Summa Cum Laude*), Seoul National University

## Working Papers

“When Export Controls Backfire: Evidence from 2019 Korea-Japan Trade Dispute”

Can export controls backfire, leading to an increase in productivity and exports in the targeted country? I use Korea's response to the 2019 Korea-Japan trade dispute to answer this question. In 2019, Japan announced export controls on South Korea for national strategic items, leaving enforcement up to Japanese officials. Although no export restrictions were imposed in practice, the potential risk alone triggered substantial changes in Korea's imports and exports. Imports from Japan declined significantly, irrespective of whether items were subject to the announcement. However, imports from Japan decreased disproportionately in sectors where Japan had been the primary supplier, and Korean producers' revenue also increased in these sectors, suggesting import substitution. Notably, Korea's exports expanded more in these sectors while prices declined, suggesting increased productivity. Motivated by these empirical findings, I structurally estimate the strength of scale economies in Korea (and elsewhere) leveraging variation in exposure to Korea's substitution away from Japan across industries (and across countries). The results support the presence of large scale economies, suggesting that export-control-induced positive shocks to domestic demand increased productivity, which in turn boosted exports.

## “Responding to Semiconductor Supply Chain Disruptions: Evidence from South Korea”

How might semiconductor producers respond to the possibility of restricted access to key imported intermediate goods? And how might this response vary across inputs? I use the response of Korean semiconductor producers amid the 2019 Korea-Japan political dispute to answer these questions. In July 2019, Japan announced potential export controls on South Korea for three key semiconductor inputs, leaving implementation to Japanese officials. Although no export restrictions were applied in practice, the announcement itself triggered uncertainty over the global supply chain, leading to drastically different responses from Korean producers across the three targeted inputs. I present a model featuring two adjustment margins—inventories and global sourcing decisions—with heterogeneity across inputs in the initial share of sourcing from Japan. I show that the calibrated model matches the heterogeneous patterns across the three inputs, suggesting that these two adjustment margins played an important role in practice. Using the model, I also solve for how Korean producers would have responded had Japan extended its export controls to other key semiconductor inputs. These counterfactual responses align with actual responses, indicating that semiconductor producers feared an extension of Japanese export controls.

## Work in Progress

“Hysteresis Effects of Geopolitical Conflicts on Consumer Goods Trade”

“Heterogeneous Effects of Geopolitical Disputes on Exports and Imports”

## Seminars and Conference Presentations

- 2025          National University of Singapore
- 2024          Korea International Economic Association (Winter Meeting), Yonsei University,  
Asia-Pacific Industrial Organisation Conference, KAEA Job Market Conference,  
CSU-Long Beach, Midwest International Trade Conference, UCLA
- 2023          Warwick Economics PhD Conference, UCLA

## Honors and Awards

- 2020-2024    Departmental Fellowship, UCLA
- 2023-2024    Lewis L. Clarke Graduate Fellowship, UCLA
- 2020          Summer Graduate Fellowship, UCLA
- 2019-2020    Fulbright Graduate Study Award
- 2017          Official Commendation, Deputy Prime Minister of Republic of Korea
- 2013          Passed the 57th National Higher Civil Service Examination, Republic of Korea
- 2008, 2011-2014    Merit Based Scholarships, Seoul National University

## Teaching

University of California, Los Angeles (Teaching Assistant)

2021-2025 Intermediate Microeconomic Theory

2022 Microeconomic Theory

## Other Information

Nationality: Republic of Korea

Military Service: Republic of Korea Army, Sergeant (2008-2010)

Language: Korean (native), English (fluent), Japanese (business proficient)
